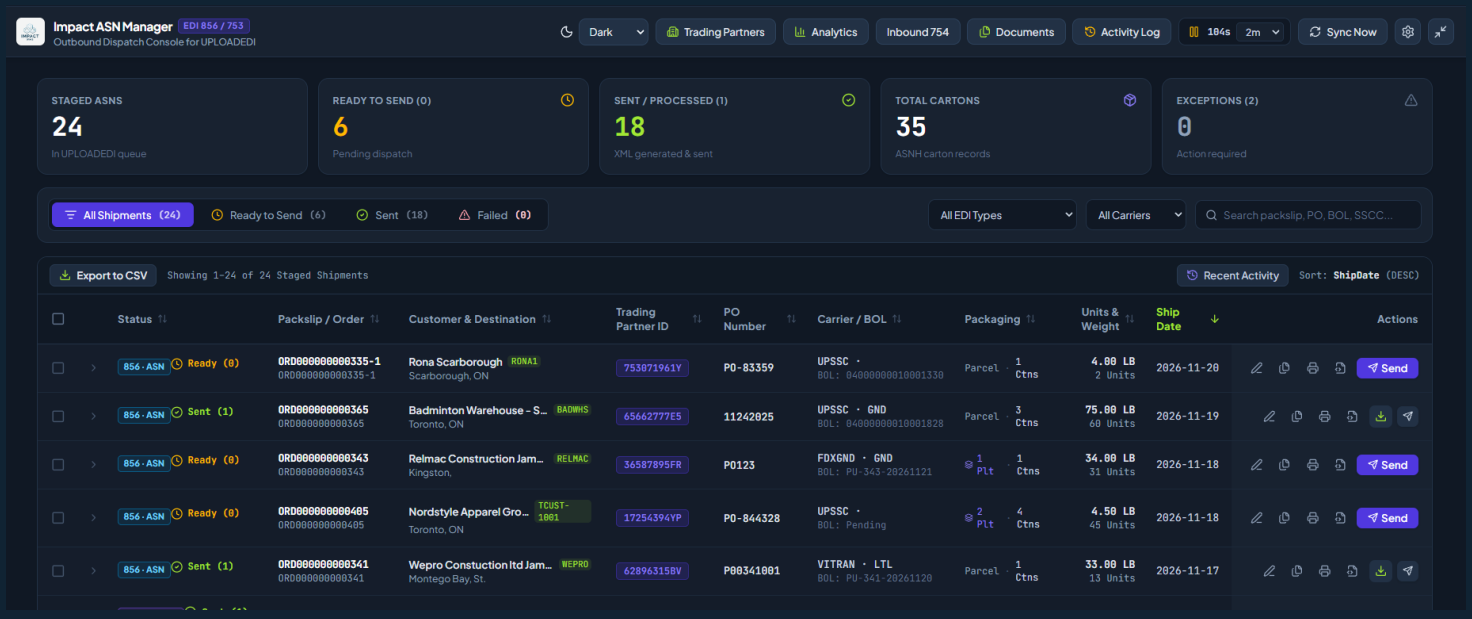
IMPACT WMS

WAREHOUSE EDGE / EDI MANAGEMENT

Impact ASN Manager

Simplify EDI. Streamline Shipping. Take Control.

A centralized shipment and EDI workspace designed for Infios Warehouse Edge. Review, manage and transmit shipment information with greater visibility and control.

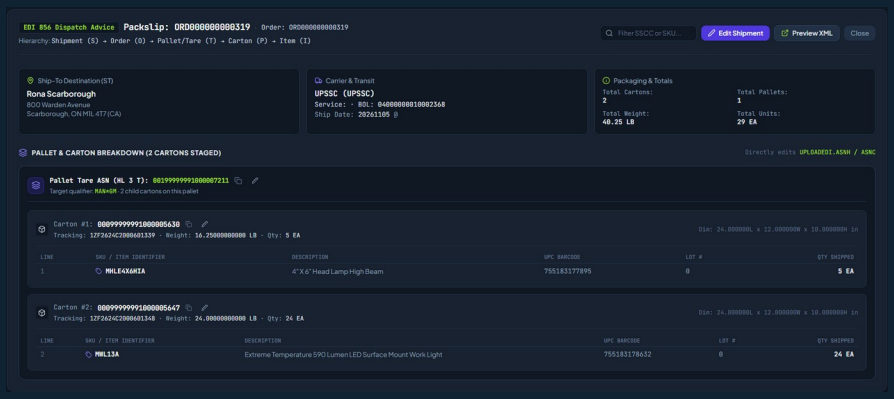


OUTBOUND DISPATCH • Monitor shipments, exceptions and transmission status.

856
Advance Ship Notices
Review pallet, carton and item details.

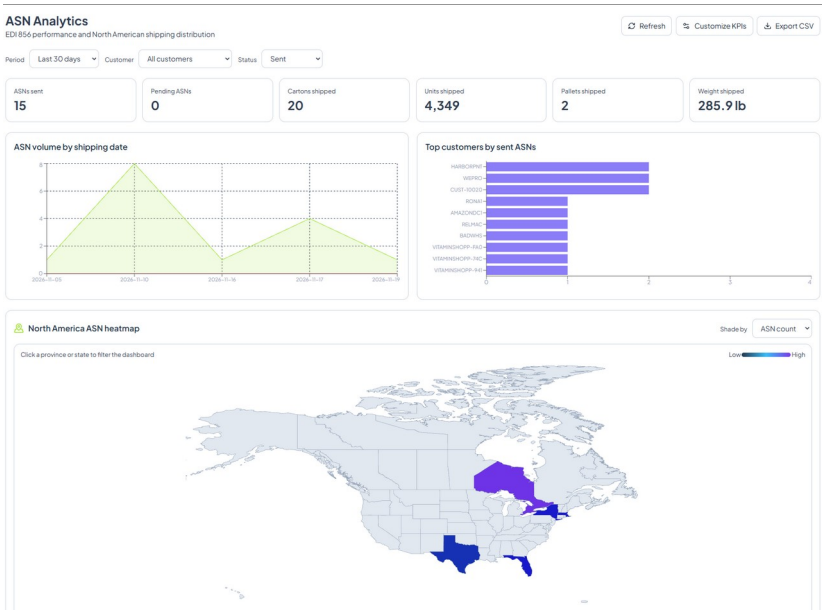
753
Routing Requests
Prepare and transmit routing requests.

754
Routing Instructions
Review inbound routing before WMS updates.



SHIPMENT DETAIL • Trace pallets, cartons, SSCCs and individual items.

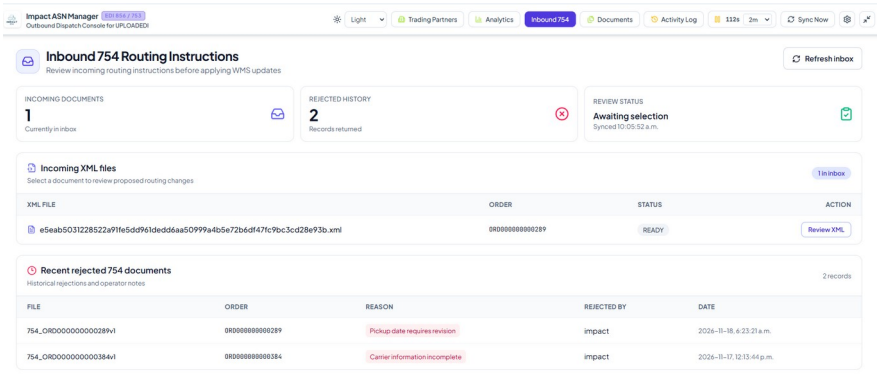
More than an ASN solution.



Actionable analytics

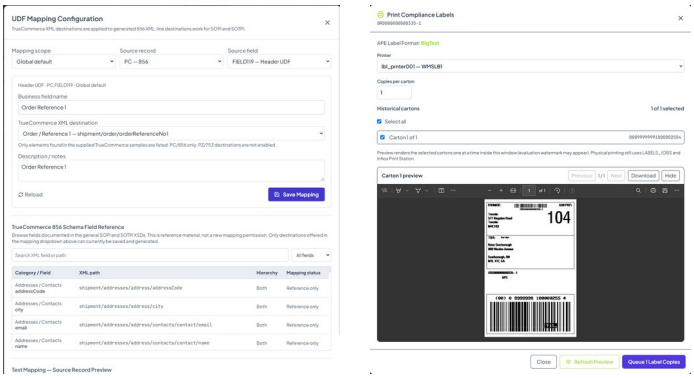
Track shipment volumes, customer activity and geographic distribution with configurable KPIs and interactive reporting.

Export shipment data for further analysis.



Routing management

Review inbound 754 instructions, approve WMS updates and retain rejection history.



Flexible mappings & documents

Configure supported trading partner field mappings. Access packing slips, bills of lading, commercial invoices and compliance label previews.

Automate transmissions by trading partner. Retrieve or resend archived XML and maintain an integrated user activity history.

Request a personalized demonstration.
