

K.Motion Skytrack

Making it fast and easy for your customer

Your customers are looking for transparent access to information. You're looking to maximize the use of your customer service people. Our tracking solution is the tool to satisfy both constituents. Your team reduces the time they spend on repetitive tasks while your community gets timely updates and statuses on their schedule rather than on yours.

Our tracking solution works in conjunction with other customer facing applications in the Körber suite to deliver:

- **Load Tracking** – the unique design supports parcel, TL and LTL shipments. Keep up to date with current shipment status, last known position and ETA.
- **Freight Order** – customers can enter new orders, link probills together into orders and accept rates returned.
- **Document Imaging** – access current copies of trip documents such as invoices, bill of lading, proof of delivery and any relevant pictures.

- **Dashboards** – assemble an array of key performance indicators (KPI) that deliver valuable insight to your customers
- **Reports** – deliver customer specific reports directly through the portal or in their email box

All of this along with the ability to dock your own web pages in the GPS tracking solution framework delivers the competitive differentiation you're looking for. Our browser based GPS tracking solution can help you lower your costs, improve your customer service and drive operational efficiencies in your business. Isn't it time to start?

Key features

- Powerful meta-data engine
- Extensive retrieval options
- Intuitive user experience
